This is an e mail from Dean Nyffeler of the Price BLM in response to a question about how long it will take to do a validity exam and get cultural resources clearances for the Martin Quarry:

Doug has signed off on a preliminary determination that the rock is common variety. When Terry finishes the IM on how to respond to those who didn't extend their notices, I will write a letter telling them they have to submit a plan of operations and set up an escrow account before we can do anymore work. Blaine Miller our archeologist has about finished Indian Consultations and site recordings.
I don't think we will ever approve any more work up there.
